

EZChange Door

Measuring Guide

Quick Change Replacement Interior Door

- 01 - Prepare**
- 02 - Door Height**
- 03 - Door Width**
- 04 - Door Thickness**
- 05 - Latch Height**
- 06 - Backset**

Prepare

01

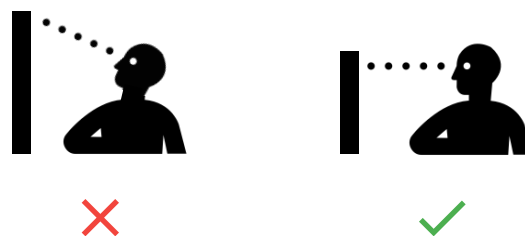

What things do I need to begin measuring?

Before ordering a new EZChange Door, we're going to need to collect a few measurements to ensure your new door fits your home perfectly.

TOOLS REQUIRED

- ☐ Tape Measure
- ☐ Pencil/Pen & Paper
- ☐ Existing Door

MEASURING TIP

Measurements are more accurate if you're at eye level with the tape

If you're a bit unsure and would like a guided process, scan the QR code below to use our digital measurement tool to help walk you through getting each measurement of your door:

Measure

by BetterHome

Scan to Install: Follow along with video instructions, see pro tips, and troubleshoot by scanning the QR code

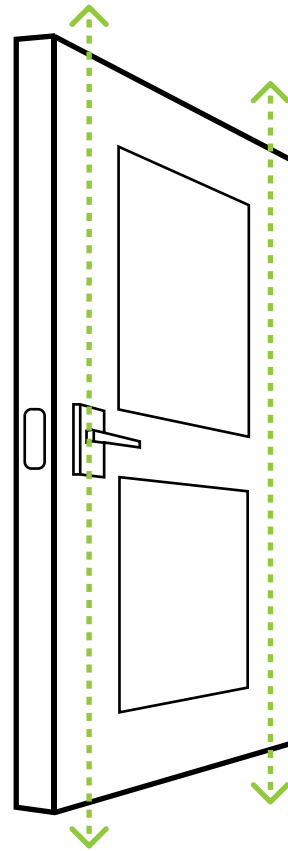

Door Height

02

Collect your door's height measurement

Measure the door height, starting from the top edge to the bottom edge.

Double check your measurements by measuring both sides of the door (hinge side and handle side).

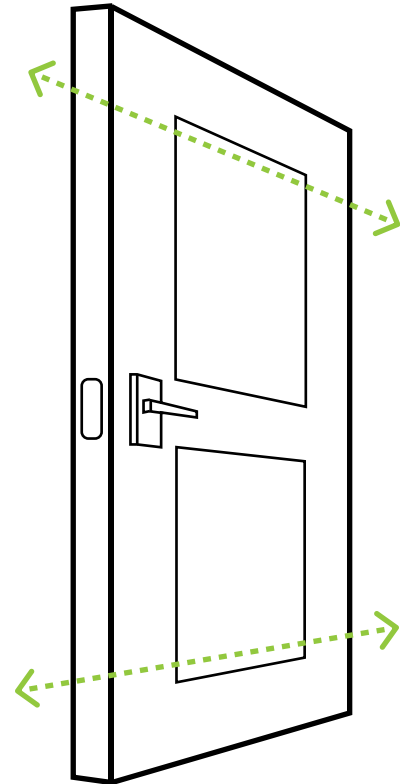

Door Width

03

Collect your door's width measurement

Measure the door width, starting from the one edge of the existing to the other edge.

Double check your measurements by checking the width at the top and bottom of the door.

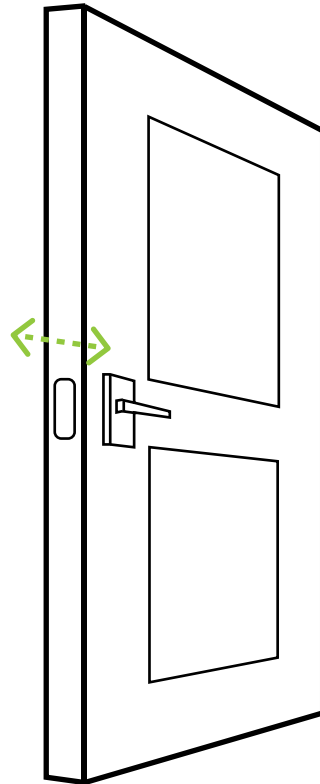

Door Thickness

04

Collect the thickness of your door

Measure the thickness of your door, starting from the inner edge and moving towards the outer edge.

Double check your measurements by measuring twice.

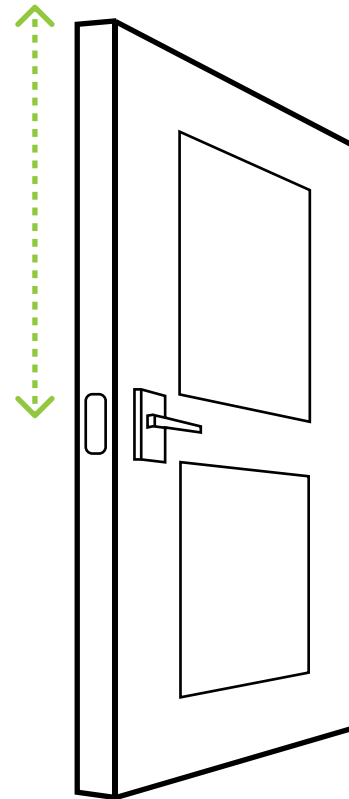

Latch Height

05

Determine the distance from the top of the door to the latch

Measure the door's latch height, starting at the top edge of the door and ending in the center of the bore (opening of the door handle).

Double check your measurements by measuring twice.

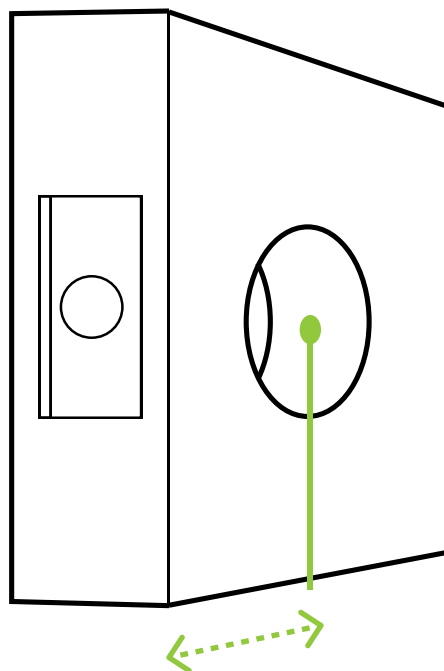

Backset

06

Determine the backset of your door

Measure the door's backset - the distance from the edge of the door to the center of the bore (opening of the door handle).

Double check your measurements by measuring twice.
